

Polytronix Glass

PolyDigit™ LED Moving Glass Display

“A Brighter Vision Through Glass”

PolyDigit™ LED Moving Display Glass is a remarkable campaign tool for commercial advertising.

Your ideas can be displayed in clear transparent glass and allows the ability to reprogram the display at any time.

This amazing product will boost the glass industry into a new era:

- ❖ You will be amazed with the beauty of PolyDigit™ - Super thin safety glass with diamond polished edges.
- ❖ Reliable high quality from the standard dimension - Which offers a fast turnaround time for your order and easy to control stability from our Polytronix Glass INC. Lab.
- ❖ Amazing Size Options - Numerous horizontal connections are available.
- ❖ PolyDigit™ allows you to display an incredible huge screen on a façade.
- ❖ Simplified software and a manual guide for easy installation - PolyDigit™ changes content freely through software after connecting the display to a computer.
- ❖ International user benefits - Supports any language, symbols that are Windows-compatible. PolyDigit™ can show moving text, symbols, logos, images, and more.
- ❖ PolyDigit™ incorporates LED chips into two sheets of glass that is then laminated as a safety glass unit. It performs as an excellent promotional tool in creating an eye-catching display.
- ❖ High performing double side brightness LEDs that conserve energy while creating bright luminance on both sides of the glass.

PolyDigit™ offers endless possibilities of what our LED moving display can do on transparent glass. What ideas can you bring to the table?
